*Attendance is free of charge. Pre-registration is required.*

### A few words about the project

The event is being organised as part of the European project **ENTICING**. The project aims at seamlessly blending the benefits of Crowdsourcing with the need to upgrade the levels of digital readiness of secondary school teachers in humanities by empowering them with competences and tools that will improve the quality of their teaching and at the same time will render them ready to respond quickly in circumstances of crisis. The project offers the ENTICING platform, which teachers in digital humanities can use as a tool for crowdsourcing. Additionally, it provides an online asynchronous course and guidelines to equip the teachers with the necessary knowledge and skills on how to apply crowdsourcing techniques. The project is co-funded by the Erasmus+ programme and its consortium consists of partners from 5 European countries.
