

# PLANNING SEEDS- NEWSLETTER

## ➤➤➤ KICK OFF MEETING

The 5th of October in Perugia (Italy) was the kick-off meeting of PLANNING SEEDs! The consortium consisting of Diosis Network, TAMAT, CARDET, KMOP, CLNR and the University of Perugia met to decide the next steps of the project!

## ➤➤➤ A FEW WORDS ABOUT THE PROJECT

PLANNING SEEDs is a 2-year Erasmus+ project that intends to respond to the European directives and critical issues of the social economy sector as outlined in the Social Economy Action Plan published by the European Commission in December 2021 and in the accompanying Staff Working Documents SWD/2021/373 and SWD/2021/982.

The project aims to strengthen youth and senior innovation and active participation in society while promoting in practice the following five sustainable development goals:

Develop a multidisciplinary methodological framework at European level for the creation of integrated and replicable social economy experiments mapped onto the EntreComp and GreenComp frameworks.

Train 14 young adults (18 - 30) with fewer opportunities and seniors (65+) from each project country (70 in total) who will become promoters of such clusters at local level.

Develop policy recommendations and guidelines for local governments and policy makers on supporting the social economy through the creation, support and promotion of SEEDs.

Create support figures for SEEDs to ensure their long-term economic sustainability.

Develop an online ecosystem for coordinating SEEDs, animating a community of practice, and training other local communities not participating in the project.
